The Economics Of Commodity Trading

March 2014 - Commodity trading is one of the oldest forms of human activity. It is central to the global economy. Yet up to now there has been remarkably little research into this important area. The Economics of Commodity Trading Firms demystifies the commodity trading business through a combination of description and analysis.

The Economics of Commodity Trading Firms | Trafigura

Several fundamental conclusions flow from the analysis: • Commodity trading firms are all essentially in the business of transforming commodities in space (logistics), in time (storage), and in form (processing). Their basic function is to perform physical “arbitrages” which enhance value through these various transformations.

THE ECONOMICS OF COMMODITY TRADING FIRMS

• Commodity trading firms utilize a variety of means to fund their transformation activities. Different commodity traders use different funding strategies involving different mixes of types of debt and debt maturities, and these funding strategies are aligned with the types
