...

Objectivity is a social value in the same way that honesty or kindness is, but it also has the property of bringing us to reliable knowledge that can best serve the moral commitment that led us to do research in the first place. The values that produce commitment drive our research and the value of objectivity helps us to better research, but it is not the only value existing in the research process itself.

Why Are Ethics Important in Research?

Research ethics is closely related to the ethical principles of social responsibility. This research covers a wide context of working with people, so the researchers raised a task not only to gain confidence in the respondents' eyes, to receive reliable data, but also to ensure the transparency of the science.
