The Metabolic Landscape Perception Practice

Perception, Practice and the Energy Transition. A book by Gina Glover, Geof Rayner, Jessica Rayner. Paperback 128 pages 118 b/w and colour ills

The Metabolic Landscape

The Metabolic Landscape is a beautifully illustrated, fascinating and engaging exploration of the unfolding relationship between energy and the landscape, and our interpretation of it. Read more Read less

The Metabolic Landscape: Perception, Practice and the ...

Just as metabolic disease refers to energy-sourced medical problems, so too the planet, the authors propose, is showing increasing signs of metabolic distress. Through large-scale photographs and a combination of long and short essays The Metabolic Landscape is an engaging exploration of the unfolding relationship between energy and the landscape, and our interpretation of it --

The metabolic landscape : perception, practice and the ...

The Metabolic Landscape navigates the disciplines of art, science and philosophy to picture and interpret the planet's current state of 'metabolic distress'. Humankind's search for more powerful sources of energy to sustain an urbanising existence has created an energy transition that, while hugely beneficial to human existence, is now being identified as a source of harm.

The Metabolic Landscape Perception, Practice and The ...

The Metabolic Landscape: Perception, Practice and The Energy Transition, by Gina Glover, Geof Rayner and Jessica Rayner. The Earth is a living organism. Our escalating energy demands are interfering with the carbon and nitrogen cycles and altered the metabolic balance of the planet.

PIGS, structures of surveillance, metabolic landscape, a ...

Our exhibition takes the title of our accompanying book, The Metabolic Landscape: Perception, Practice and the Energy Transition. Metabolism refers to the energy system of any living organism, including humans. We process energy from food and burn this energy through physical and mental activity in terms not so very different from a candle.

The Metabolic Landscape | Birmingham City University

We live for the day when Indigenous peoples around the world are able to practice self-determination; when their human, economic, social, cultural, political and territorial rights are recognized and respected; when they are free to speak their languages, maintain their sacred traditions, and continue the work of caring for their ancestral homelands.

Land is Life

Although many efforts have been made to connect landscape architecture with broader arts and culture, there remain divides in the perception of the discipline's connection to other arts. The information age and D.I.Y. culture have made tools and maker-spaces more accessible than ever.
