The Modern World-System Immanuel Wallerstein-----In order to describe the origins and initial workings of a world system, I have had to argue a certain conception of a world-system. A world-system is a social system, one that has boundaries, structures, member groups, rules of legitimation, and coherence. Its life is made up of the

The Modern World-System Immanuel Wallerstein

Wallerstein's modern world-system is specifically a capitalist world economy with capitalism defined as "the endless accumulation of capital" (Wallerstein 2004, p. 24). Using a metaphor that recalls the theories of Scottish economist Adam Smith (1723-1790), Wallerstein defines the world-system as a geographical division of labor.

Modern World-System Analysis | Encyclopedia.com

The modern world-system, a capitalist world-economy, is unique in being the first and only world-system, which emerged around 1450 to 1550, to have geographically expanded across the entire planet, by about 1900. It is defined, as a world-economy, in having many political units tied together as an interstate system and through its division of ...
