The Really Hard Problem: Meaning in a Material World. If consciousness is "the hard problem" in mind science – explaining how the amazing private world of consciousness emerges from neuronal activity – then "the really hard problem," writes Flanagan, is explaining how meaning is possible in the material world. How can we make sense of the magic and mystery of life naturalistically, without an appeal to the supernatural?

Finding Meaning in a Material World | Philosophy Talk

Definition. A decision problem H is NP-hard when for every problem L in NP, there is a polynomial-time many-one reduction from L to H.: 80 An equivalent definition is to require that every problem L in NP can be solved in polynomial time by an oracle machine with an oracle for H. Informally, an algorithm can be thought of that calls such an oracle machine as a subroutine for solving H and ...

NP-hardness - Wikipedia

The hard problem of consciousness (Chalmers 1995) is the problem of explaining the relationship between physical phenomena, such as brain processes, and experience (i.e., phenomenal consciousness, or mental states/events with phenomenal qualities or qualia). Why are physical processes ever accompanied by experience?
