Commander KWL-1018VS is the new lathe of choice. Although, it's a bit smaller than my older lathe in terms of overall size and max distance between centers, but 1/3 larger in hp. The Commander is feature rich compared to other lathes in its price range.

Nice midi lathe. Replaced the PSI Turncrafter Pro I had (I wanted the variable speed). The variable speed is great and worth the extra cost. The Turncrafter Pro was marketed as an 8" swing and this one is marketed as a 10" swing which was another reason I go the new lathe BUT they are both exactly the same size.

The Turncrafter Commander is one of only three lathes in this review without reverse (the others are the Rockler Excelsior and the Steelex), a feature I have always considered dubious. The slight, if doubtful, advantage in sanding in the opposite direction is outweighed by the danger of unscrewing a heavily

The Turncrafter is heavily underpowered—compared to the six other 12" VS lathes I tested—for turning anything over a few inches in diameter. The belt slips easily, preventing making any heavy cuts. Still, if you can nurse your cuts, this lathe will accomplish about any size turning. The belt is
