Archaeology Under the Canopy has four main components: the forest canopy, the practice of forest gardening, the leaf litter on the forest floor, and the ancient monuments. Each of these components plays an important part of the innovative conservation strategy. The natural environment is recognized as protection for ancient monuments.

Reality is somewhat different. In Under the Canopy: the Archaeology of Tropical Rain Forests, Julio Mercader showed that archaeological research, though much more difficult in forests than in open areas, has demonstrated human presence for more than 40 millenia. Moreover, agriculture in tropical forests started more than 3,000 years ago, and botanists have shown how much cultivation has modified these forests.
